COMING SOON

Halla

A new way to buy and sell in El Hueco.

THE CONTEXT

Medellín's most iconic commercial hub.

Thousands of stores, one way of doing business that has barely changed.

THE IDEA

We're building the product that changes how El Hueco works.

Details stay private for now.

Built the professional way.

The technical flow, from the screen to the database.

INTERFACE

Next.js

Tailwind CSS

→

SERVER STATE

TanStack Query

Cache and sync

→

LOGIC

Feature modules

API and services

→

DATA

MongoDB

Document database

Everything containerized with Docker and orchestrated with Kubernetes.

How it is engineered.

ARCHITECTURE

Module by feature

- Each feature owns its UI, hooks, services and types.
- Self-contained, so it scales and is easy to maintain.
- Shared code lives in a common layer.

DATA FLOW

TanStack Query

- Server state managed in one place.
- Smart caching and background refetching.
- Fast interfaces with fewer requests.

DELIVERY

Docker and Kubernetes

- Identical containers in every environment.
- Orchestrated deployments, scaling and recovery.
- Ready to grow with the product.

Our biggest and most ambitious project.
